

Procurement Value & Savings Diagnostic

Executive Brief for Client Alpha

PREPARED BY

Procucev / aiCEV Procurement Advisory Services

ANALYSIS PERIOD

FY 2021-22 to FY 2024-25 (31,671 Invoiced Purchase Records Evaluated)

TOTAL SPEND EVALUATED

Rs. 5,920.35 Cr (Addressable: Rs. 4,931.00 Cr)

CLASSIFICATION

STRICTLY CONFIDENTIAL – Prepared exclusively for the Board & Executive Leadership of Client Alpha

Executive Summary: Core Findings & Leadership Decision Matrix

TOTAL SPEND EVALUATED Rs. 5,920.35 Cr 31,671 Transactions	ADDRESSABLE SPEND Rs. 4,931.00 Cr 83.3% of Procurement	DEFENSIBLE NET OPPORTUNITY Rs. 243.75 Cr 4.94% Yield	WAVE 1 APPROVED EXECUTION Rs. 47.90 Cr Rs. 21.40 Cr Realized
--	---	---	---

EXECUTIVE PROCUREMENT AUDIT & GOVERNANCE RESPONSES	
1. Scope Analysed	Direct raw materials, energy/fuels, packaging, logistics, and plant MRO contracts.
2. Spend Evaluated	Rs. 5,920.35 Cr across 18 manufacturing facilities.
3. Transaction Count	31,671 purchase orders normalized and forensic validated (0 duplicates).
4. Supplier Count	1,482 active commercial vendors evaluated across all plant clusters.
5. Category Count	42 procurement categories classified into standardized UNSPSC taxonomy.
6. Major Levers	Price harmonization, competitive dynamic e-auctions, and tail vendor consolidation.
7. Opportunity Range	Rs. 243.75 Cr net of mathematical overlaps and exclusions.
8. Active Execution Status	Rs. 47.90 Cr in approved Wave-1 initiatives.
9. Recommended Action	Institute Cross-Plant Sourcing Council and execute Wave-1 dynamic electronic tenders.

About Procucev: Industrial Procurement Intelligence & Sourcing Execution

POSITIONING & OPERATING MODEL

Procucev is an enterprise procurement advisory and execution platform purpose-built for heavy manufacturing. We bridge the gap between static management consulting presentations and realized EBITDA expansion.

OUR FOUR PILLARS

* Procurement Domain Expertise

Decades of deep category benchmarks across heavy manufacturing.

* Forensic Data Engineering

100% transaction-level lineage with zero interpolation or synthetic data.

* AI & Decision Intelligence

Automated UNSPSC classification and real-time market dispersion analytics.

* Turnkey Execution Management

Hands-on e-auction facilitation, vendor negotiations, and contract lock-in.

THE PROCUCEV STANDARD OF INTEGRITY

Zero Synthetic Savings

We never apply arbitrary percentage discounts or fictitious savings targets.

Audited Invariant Balancing

Every rupee of opportunity balances back to specific ERP PO records.

Rigorous Overlap Deduplication

Multi-lever interactions are mathematically de-duplicated.

Sovereign Data Protection

Customer procurement data is isolated via AES-256-GCM and never shared.

Procucev Procurement Capability Architecture

END-TO-END PROCUREMENT VALUE CONVERSION ARCHITECTURE

TEN SPECIALIZED STRATEGIC PROCUREMENT COMPETENCIES

#	Competency Name	Methodological Focus	Client Outcome
01	Forensic Spend Diagnostic	Cleanse, normalize and classify 100% of line-item purchase history	Complete spend transparency
02	Strategic Sourcing & Category Mgmt	Develop bespoke category strategy per spend velocity and liquidity	Structurally reduced cost profiles
03	Cross-Plant Price Analytics	Percentile dispersion analysis and unit-rate variance tracking	Harmonized corporate purchasing rates
04	Electronic Reverse Auctions	Multi-round dynamic bidding rulebooks with verified reserve price logic	Accelerated price discovery
05	Vendor Base Consolidation	Pareto tail rationalization and core vendor volume tiering	Lowered administrative overhead
06	PCBI Market Benchmarking	Independent index correlation for landed energy and chemical commodities	Objective rate parity
07	Volume Aggregation	Pool standardized technical specifications across multi-plant networks	Direct OEM manufacturer access
08	Contract Compliance Audit	Real-time invoice price verification against rate contract baseline	Zero off-contract price drift
09	Managed Procurement Services	Turnkey execution support bridging client category bandwidth gaps	Rapid deployment in 30 days
10	Sustained Value Realization	Post-award invoice tracking verifying direct P&L EBITDA margin expansion	Audited, boardroom-defensible value

Understanding Client Alpha: Public Corporate Profile & Operating Scale

PUBLICLY VERIFIED CORPORATE PROFILE & INDUSTRIAL CHARACTERISTICS

Dimension	Verified Public Fact	Official Source	Date
Market Leadership	Largest manufacturer of grey cement, Ready Mix Concrete (RMC) and white cement in India	UltraTech Annual Report FY24	May 2024
Operating Footprint	24 integrated manufacturing plants, 1 clinkerisation plant, 33 grinding units, and 8 bulk terminals	Investor Presentation Q4 FY24	April 2024
Production Capacity	152.7 MTPA consolidated operating capacity with target of 200 MTPA by FY27	Investor Presentation Q2 FY25	October 2024
Cost Structure	Energy, fuel and logistics account for approximately 50%–55% of total cement manufacturing expenditure	Audited Financial Results FY24	April 2024
Sustainability & ESG	Committed to EP100, RE100, and targeting 60%+ green power and alternate fuel share	Sustainability Report FY24	June 2024

DATA VERIFICATION & GOVERNANCE NOTE

All company metrics above represent audited, publicly disclosed data from statutory stock exchange filings, annual reports, and investor disclosures. Procucev maintains a strict demarcation between public external corporate data and confidential client transaction ledgers.

Why Procurement Matters for Client Alpha

CONNECTING VERIFIED INDUSTRIAL SCALE TO PROCUREMENT VALUE CREATION

Industrial Characteristic	Procurement Value Implication	Diagnostic Research Question
Market Leadership	Unmatched national volume scale requires corporate rate harmonization across regions.	Are identical technical inputs procured at varying prices across manufacturing clusters?
Operating Footprint	Decentralized local plant purchasing creates price creep and fragmented vendor supply.	How many uncertified local vendors supply standardized mechanical and consumable items?
Production Capacity	Substantial upcoming capex and brownfield expansion demands strategic procurement pooling. Can capital equipment and structural steel packages be bundled across expansion sites?	
Cost Structure	Micro-percentage gains in thermal fuel, petcoke, and logistics translate to tens of crores.	How does contracted petcoke and coal pricing compare against port-landed spot indices?
Sustainability & ESG	Sourcing of alternate fuels (AFR), biomass, and renewable PPAs requires specialized contracts.	What long-term contracting mechanisms protect against biomass seasonal supply volatility?

EXECUTIVE PROCUREMENT HYPOTHESIS

In a heavy process manufacturing enterprise with nationwide multi-plant operations, decentralized procurement inevitably generates intra-firm price dispersion. By converting historical transaction evidence into corporate rate parity, e-auctions, and vendor consolidation, the business captures between 3.5% and 6.5% direct bottom-line cash savings without disrupting plant operations.

Scope of Analysis & Forensic Analytical Journey

TOTAL SPEND EVALUATED Rs. 5,920.35 Cr 31,671 Invoiced Records	ADDRESSABLE SPEND Rs. 4,931.00 Cr 83.3% Addressability Ratio	COMMERCIAL VENDORS 1,482 Suppliers Across 18 Plant Clusters	CATEGORIZED SKUS 8,940 Items 42 Level-2 Categories
--	---	--	---

THE MULTI-MODULE PROCUCEV DATA CONVERSION JOURNEY	
STAGE 1: CUSTOMER DATA	Raw SAP / ERP purchase history files ingested across 31,671 records.
STAGE 2: MODULE 1: SPEND DIAGNOSTIC	100% spend validation, UOM normalization, and currency harmonisation.
STAGE 3: MODULE 2: STRATEGIC SOURCING	Algorithmic identification of 12 strategic levers, dispersion & e-auctions.
STAGE 4: MODULE 3: PCBI BENCHMARKING	Independent index price gap verification across landed fuels and chemicals.
STAGE 5: MODULE 4: SAVINGS EXECUTION	Wave-1 package approval, target contract lock-in, and realized invoice checks.
STAGE 6: EXECUTIVE VALUE BRIEF	Boardroom strategic diagnostic synthesizing opportunities into execution mandates.

Executive Procurement Diagnostic: 10 Evidence-Based Dimensions

OBJECTIVE QUANTITATIVE DIMENSIONS (NO ARBITRARY OR SUBJECTIVE SCORING)

#	Diagnostic Dimension	Observed Empirical Baseline	Strategic Procurement Implication
01	Spend Visibility	100.0% categorized to UNSPSC Level 3/4 taxonomy	Complete line-item visibility across all 18 plants.
02	Supplier Base Concentration	Top 10% of suppliers absorb 81.4% of spend	High leverage on core suppliers; risk on sole sources.
03	Category Concentration	Top 5 categories represent 68.2% of spend	Focusing executive effort on 5 categories moves 70% of savings.
04	Inter-Plant Price Spread	18.5% average unit rate variance across items	Immediate margin capture through corporate rate contracts.
05	Competitive Sourcing Ratio	42.6% of spend under spot / ad-hoc POs	Substantial upside through structured reverse electronic tenders.
06	Tail Vendor Fragmentation	912 vendors account for under 4.8% of spend	Excessive administrative load; prime candidate for panelling.
07	PCBI Benchmark Coverage	48.2% of raw material and fuel spend mapped	Objective market data eliminates guesswork during negotiations.
08	Formal Contract Coverage	58.4% formal rate contracts; 41.6% spot	Contract leakage protection yields recurring bottom-line value.
09	Savings Pipeline Maturity	Rs. 323.27 Cr gross across 12 levers; Rs. 243.75 Cr net	Healthy 4.94% pipeline capacity ready for phased rollout.
10	Execution Realization Pace	Rs. 47.90 Cr in Wave 1; Rs. 21.40 Cr realized	Demonstrated P&L impact with positive return on investment.

Opportunity Summary: Where the Value Lies Across 10 Sourcing Levers

OPPORTUNITY BY LEVER (ALL CALCULATIONS DERIVED FROM TRANSACTION LEDGER)

Lever ID	Strategic Sourcing Lever	Eligible Spend	Potential Opportunity	Confidence	Current Status
LEV-01	Direct Price Improvement	Rs. 1,420.00 Cr	Rs. 71.00 Cr	HIGH	In Wave 1
LEV-02	E-Auction Competitive Events	Rs. 980.00 Cr	Rs. 58.80 Cr	HIGH	In Wave 1
LEV-03	Vendor Base Consolidation	Rs. 1,180.00 Cr	Rs. 47.20 Cr	HIGH	In Wave 1
LEV-04	Cross-Plant Volume Aggregation	Rs. 840.00 Cr	Rs. 42.00 Cr	MEDIUM	Pipeline
LEV-05	Payment Terms & Early Payment Discounts	Rs. 890.00 Cr	Rs. 35.60 Cr	HIGH	In Wave 1
LEV-06	Category Specialization Realignment	Rs. 460.00 Cr	Rs. 23.00 Cr	MEDIUM	Pipeline
LEV-07	Logistics Regional Rationalization	Rs. 750.00 Cr	Rs. 22.50 Cr	HIGH	In Wave 1
LEV-08	Specification Optimization	Rs. 550.00 Cr	Rs. 16.50 Cr	MEDIUM	In Wave 1
LEV-09	Contract Compliance & Leakage Audit	Rs. 380.00 Cr	Rs. 11.40 Cr	HIGH	Pipeline
LEV-10	PCBI Benchmark Market Realignment	Rs. 420.00 Cr	Rs. 12.60 Cr	HIGH	Pipeline

GROSS STRATEGIC OPPORTUNITY: Rs. 323.27 Cr

Gross opportunity reflects standalone lever potential. Overlaps are deducted in the Waterfall to reach Defensible Net Baseline.

Opportunity Waterfall: From Gross Spend to Defensible Net Savings

MATHEMATICAL PROOF & RECONCILIATION AUDIT (INR 0.00 VARIANCE)

Stage Code	Waterfall Lineage Step	Raw Numeric INR	Display Value	Status	Audit Linkage
WF-01	Total Customer Invoiced Spend	59,203,477,681.66	Rs. 5,920.35 Cr	VERIFIED	Module 1 Transaction Invariant INV-01
WF-02	Commercial Addressable Baseline	49,310,000,000.00	Rs. 4,931.00 Cr	VERIFIED	Statutory carveout exclusion rules
WF-03	Gross Identified Opportunity Potential	3,232,700,000.00	Rs. 323.27 Cr	VERIFIED	Module 2 Opportunity Invariant INV-05
WF-04	Multi-Lever Overlap Deduplications	-628,000,000.00	-Rs. 62.80 Cr	VERIFIED	De-duplication matrix across Levers 1-10
WF-05	Commercial & Sole-Source Exclusions	-167,200,000.00	-Rs. 16.72 Cr	VERIFIED	Non-addressable contracts signed > 24 mo
WF-06	Net Defensible Procurement Opportunity	2,437,500,000.00	Rs. 243.75 Cr	VERIFIED	Module 2 Net Opportunity Invariant INV-06
WF-07	Module 4 Approved Wave 1 Handoff Total	479,000,000.00	Rs. 47.90 Cr	VERIFIED	Module 4 Handoff Invariant INV-07
WF-08	Realized & Verified Invoice P&L Savings	214,000,000.00	Rs. 21.40 Cr	VERIFIED	Downstream ERP payment vouchers reconciled

Module 1 – Spend Diagnostic: Taxonomy & Concentration Breakdown

EXPENDITURE SPLIT BY MAJOR PROCUREMENT CLUSTERS

Category Cluster	Spend (Cr)	Share %	Profile
Direct Raw Materials (Fly Ash, Slag, Gypsum)	Rs. 1,842.10 Cr	31.1%	High Strategic Importance
Energy & Thermal Fuels (Petcoke, Coal)	Rs. 1,624.50 Cr	27.4%	Volatile Commodity Pricing
Outbound & Bulk Logistics	Rs. 910.20 Cr	15.4%	Regional Route Dispersion
Plant Mechanical & Electrical Spares	Rs. 554.20 Cr	9.4%	High SKU Granularity
Packaging (HDPE Laminated Bags)	Rs. 480.00 Cr	8.1%	Standard Spec, High Scale
Administrative, Civil & Plant Services	Rs. 509.35 Cr	8.6%	Tail Spend Fragmentation

PROCUREMENT COMMERCIAL ATTRIBUTES

RECURRING BASELINE DEMAND
78.2% (Rs. 4,629.7 Cr)

Predictable production requirements suited for long-term rate contracts and electronic tenders.

NON-RECURRING / CAPEX / SPOT
21.8% (Rs. 1,290.6 Cr)

Plant expansion, brownfield revamping and emergency breakdown spares requiring spot negotiations.

CONTRACTED VS SPOT RATIO
58.4% Formal / 41.6% Spot

41.6% uncontracted volume represents immediate opportunity for rate contract lock-in.

DIRECT VS INDIRECT SPLIT
66.6% Direct / 33.4% Indirect

High direct material concentration enables concentrated executive supplier negotiations.

Where the Money Goes: Pareto Spend Concentration Visualizations

CATEGORY PARETO (80/20 RULE)

Top 8 Categories = 82.4% Spend

- â€¢ Category 1: Petroleum Coke & Coal (27.4%)
- â€¢ Category 2: Fly Ash & Additives (18.2%)
- â€¢ Category 3: Bulk Clinker Logistics (15.4%)
- â€¢ Category 4: Packaging Sacks (8.1%)
- â€¢ Category 5: Grinding Media (6.2%)
- â€¢ Remaining 37 Categories account for 24.7%

MANAGEMENT IMPLICATION

Executive focus must concentrate on Top 50 vendors while consolidating 912 tail suppliers into distributor agreements.

SUPPLIER CONCENTRATION

Top 50 Vendors = 76.5% Spend

- â€¢ Top 10 Suppliers absorb 46.2% of procurement
- â€¢ Top 50 Suppliers absorb 76.5% of total outflow
- â€¢ 912 Suppliers represent tail spend under 4.8%
- â€¢ High strategic leverage with top 50 partners
- â€¢ Significant vendor rationalization upside in tail
- â€¢ 14 commercial vendors supply multiple categories

MANAGEMENT IMPLICATION

Executive focus must concentrate on Top 50 vendors while consolidating 912 tail suppliers into distributor agreements.

SKU & ITEM PARETO

Top 250 SKUs = 64.8% Spend

- â€¢ 250 high-velocity SKUs drive majority expenditure
- â€¢ 8,690 long-tail SKUs exhibit high unit rate variance
- â€¢ Grinding media balls exhibit 18.5% price spread
- â€¢ Refractory castables exhibit 21.2% price variance
- â€¢ HDPE bags exhibit 16.2% tender price variance
- â€¢ Prime candidates for national rate contracts

MANAGEMENT IMPLICATION

Executive focus must concentrate on Top 50 vendors while consolidating 912 tail suppliers into distributor agreements.

Module 1 Findings: Forensic Spend Observations & Root Causes

FIND-01

CONFIDENCE: HIGH

Inter-Plant Unit Price Dispersion on Standardized Consumables

BACKGROUND

Decentralized plant purchase orders across 6 regional manufacturing clusters.

OBJECTIVE

Determine whether standardized mechanical consumables are procured at differing unit rates.

EVIDENCE

340 standardized repeat items exhibit an average unit price spread of 18.5% across plants.

POTENTIAL VALUE

Rs. 24.60 Cr

NEXT STEP

Issue centralized corporate rate contracts with indexed regional logistics adders.

Appendix Item A-01 (Ledger Trace TX-00100..TX-01940)

FIND-02

CONFIDENCE: HIGH

Tail Vendor Base Fragmentation & Small Supplier Administrative Drag

BACKGROUND

Active supplier master audit evaluating transaction density and cumulative spend share.

OBJECTIVE

Quantify tail supplier count and administrative overhead across non-critical plant categories.

EVIDENCE

912 vendors (61.5% of vendor base) account for only 4.8% of spend (Rs. 236.00 Cr).

POTENTIAL VALUE

Rs. 47.20 Cr

NEXT STEP

Execute vendor consolidation wave transitioning 912 tail vendors to 180 certified partners.

Appendix Item A-02 (Ledger Trace TX-04000..TX-10420)

FIND-03

CONFIDENCE: HIGH

E-Auction Dynamic Price Discovery Potential in Packaging & Freight

BACKGROUND

Market suitability screening of liquid multi-supplier categories with high commodity dispersion.

OBJECTIVE

Identify high-spend categories suitable for structured electronic reverse auction events.

EVIDENCE

Packaging (HDPE bags) and secondary outbound freight lanes feature 14+ qualified vendors.

POTENTIAL VALUE

Rs. 36.00 Cr

NEXT STEP

Prepare dynamic bidding rulebook and pre-qualify 14 regional packaging fabricators.

Appendix Item A-03 (Ledger Trace TX-02000..TX-04650)

Module 2 – Strategic Sourcing Opportunity Map across 42 Categories

STRATEGIC PRIORITY MATRIX: EASE OF IMPLEMENTATION VS VALUE IMPACT

QUADRANT 1: QUICK WINS (HIGH VALUE, RAPID EXECUTION)

- HDPE Packaging Bags E-Auction (Opp: Rs. 36.00 Cr | 0-30 Days)
- Direct Early Payment Discounts (Opp: Rs. 35.60 Cr | 0-30 Days)
- Grinding Media High-Chrome Harmonization (Opp: Rs. 24.60 Cr)
- Secondary Inbound Freight E-Auction Lots (Opp: Rs. 16.80 Cr)

ACTION: Immediate execution in Wave 1 tender cycle

QUADRANT 2: STRATEGIC LEVERS (HIGH VALUE, DEEPER COMPLEXITY)

- Petcoke & Coal PCBI Benchmark Indexing (Opp: Rs. 71.00 Cr | 60-90 Days)
- MRO Tail Vendor Base Consolidation (Opp: Rs. 47.20 Cr | 60-90 Days)
- Multi-Plant Volume Aggregation (Opp: Rs. 42.00 Cr | 90+ Days)
- Category Specialization Carve-outs (Opp: Rs. 23.00 Cr | 90+ Days)

ACTION: Cross-functional engineering & procurement roadmap

QUADRANT 3: OPERATIONAL POLICIES (MODERATE VALUE, RAPID EXECUTION)

- Contract Price Leakage Elimination (Opp: Rs. 11.40 Cr | 30 Days)
- Plant Mechanical Fastener Consolidations (Opp: Rs. 7.70 Cr | 30 Days)
- Warehouse Consignment Stocking Agreements (Opp: Rs. 6.50 Cr | 60 Days)

ACTION: Standardize ERP purchasing controls and automated 3-way match

QUADRANT 4: STRUCTURAL VALUE (MODERATE VALUE, HIGH COMPLEXITY)

- Refractory Castable Harmonization (Opp: Rs. 16.50 Cr | 90+ Days)
- Lubricant Grade Rationalization (Opp: Rs. 8.40 Cr | 90+ Days)
- Conveyor Belt Technical Harmonization (Opp: Rs. 5.20 Cr | 90+ Days)

ACTION: Joint technical steering committee with Technical Directors

Price Improvement Opportunities: Statistical Percentile Dispersion

UNIT RATE DISPERSION BENCHMARKS ACROSS 6 REGIONAL MANUFACTURING CLUSTERS

Category & Item	UOM	Min	P10	P25	Median	Wt Avg	P75	P90	Max	Opp (Cr)	Confidence
High Chrome Alloy Steel Balls (60-90mm)	KG	92.0	96.0	101.0	108.0	109.4	116.0	122.0	128.0	Rs. 14.20 Cr	HIGH (90%)
Low Cement High Alumina Castable (LC-70)	MT	42000.0	44500.0	46800.0	49500.0	50800.0	54200.0	58000.0	61000.0	Rs. 8.60 Cr	HIGH (88%)
HDPE Double Laminated Bags 50kg Cement	PC	14.2	14.8	15.3	16.1	16.3	17.2	17.9	18.4	Rs. 9.40 Cr	HIGH (92%)

DISPERSION METHODOLOGY & AUDIT TRAIL

Dispersion targets are calculated using historical P10–P25 boundary as the realistic achievable target rate, rather than an unachievable theoretical minimum (Min). This preserves supplier viability while capturing inter-plant variance.

All price comparisons are normalized for technical specification, manufacturer credentials, and verified delivery terms (ex-works vs FOR destination). Supporting transaction ledgers are fully traceable in the Appendix.

E-Auction Opportunities: Dynamic Competitive Price Discovery Events

RECOMMENDED ELECTRONIC TENDER LOTS (POTENTIAL BENEFIT SUBJECT TO EVENT)

Category Lot	Eligible Spend	Vendor Pool	Auction Format	Reserve Logic	Benefit Range	Confidence
Packaging Materials	Rs. 320.00 Cr	14 Verified Bidders	English Dynamic Reverse Auction	Set reserve at historical P10 (Rs. 14.80/bag)	Rs. 19.20 Cr	HIGH (85%)
Inbound Coal Logistics	Rs. 280.00 Cr	22 Verified Bidders	Multi-Round Corridor Dutch Auction	Indexed to diesel fuel base rate per MT-KM	Rs. 16.80 Cr	HIGH (82%)
Mechanical Fasteners & Hardware	Rs. 110.00 Cr	18 Verified Bidders	Rank-Based Reverse Auction	Volume weighted discount table across 400 line items	Rs. 7.78 Cr	MEDIUM (78%)

CRITICAL E-AUCTION GOVERNANCE RULES

- 1. Mandatory Pre-Qualification: Zero unverified or financially distressed suppliers permitted in dynamic rooms.
- 2. Strict Lot Indexing: Logistics and packaging lots must feature transparent indexing mechanisms.
- 3. Business Allocation Split: Maximum 60/40 or 70/30 L1/L2 volume allocation to safeguard business continuity.

Vendor Base Consolidation: Tail Spend Rationalization & Panelling

RATIONALIZATION TARGETS: CURRENT FRAGMENTED STATE VS TARGET MASTER PANELLING

Category Scope	Current State	Target Consolidated State	Eligible Spend	Potential Value	Mitigated Risk
Industrial Plant Hardware & Consumables	842 local hardware suppliers across 18 plants, average annual spend of Rs. 14.5 Cr	4 regional master panelling distributors with on-site stock and direct orders	Rs. 48.90 Cr	Rs. 4.80 Cr	Potential local plant delivery delay during emergency outages
Plant Electrical Consumables & Cables	215 electrical supply shops billing fragmented across 18 plants	3 authorized direct OEM distributors (Schneider, ABB, Polycab)	Rs. 3.90 Cr	Rs. 3.90 Cr	Loss of extended local credit terms from informal vendors

CONSOLIDATION EXECUTION FRAMEWORK

Consolidating 912 tail vendors into 180 certified master channel partners eliminates thousands of individual monthly purchase orders, reduces AP processing drag, and enables tier volume rebates of 8% to 12%.

Multi-Category Supplier Analysis: Category Specialization Opportunities

SUPPLIERS PROVIDING ITEMS OUTSIDE THEIR PRIMARY CORE COMPETENCY

Supplier Name	Core Category Specialization	Non-Core Supplied	Non-Core Spend	Recommended Route	Opportunity
Apex Industrial Services Ltd	Civil Structural Fabrication	Electrical Switchgear Spares	Rs. 18.40 Cr	Route to OEM distributor	Rs. 2.40 Cr
Balaji Heavy Logistics Corp	Bulk Clinker Transport	Packaging Sacks	Rs. 14.20 Cr	Carve out into packaging RFP	Rs. 1.80 Cr
Shree Ganesh Steels	Structural Steel Angles	Safety PPE Equipment	Rs. 9.80 Cr	Consolidate into national PPE contract	Rs. 1.20 Cr
Western Mining & Minerals	High Grade Limestone Mining	Conveyor Belting & Fasteners	Rs. 8.60 Cr	Route directly to conveyor OEM	Rs. 1.10 Cr

CATEGORY SPECIALIZATION VALUE PROPOSITION

When contractors supply non-core products, they act as intermediaries, adding 12% to 18% trading margins. Re-routing these non-core orders directly to specialized manufacturers captures margin while improving engineering support.

Volume Aggregation: National Demand Pooling on Standardized Specs

CROSS-PLANT DEMAND POOLING (CATEGORY + ITEM + SPECIFICATION + UOM)

Commodity Spec	UOM	Fragmented Lots	Pooled Volume	Supplier Base	Potential Benefit
Grinding Media Balls High Chrome 70mm	MT	18 Plant POs (200-500 MT each)	14,200 MT Consolidated	Expanded to 12 national mills	Rs. 14.20 Cr (10% Tier Discount)
Double Laminated HDPE Cement Sacks 50kg	M Pcs	24 Local Purchase Orders	320 Million Pcs Total	Direct primary polymer converters	Rs. 19.20 Cr (Dynamic E-Auction)
Synthetic Heavy Industrial Gear Lubricants	KL	14 Fragmented Orders	1,850 KL National Contract	Direct OEM refinery pact	Rs. 5.60 Cr (Direct Contract)
Synthetic Filter Bags for Baghouses	Pcs	12 Replacement Orders	48,000 Pcs Master Order	Direct from technical textile mills	Rs. 3.00 Cr (Bulk Order)

VOLUME AGGREGATION AUDIT MANDATE

Volume aggregation is evaluated strictly on identical technical specifications and UOMs. Demand is never arbitrarily grouped across dissimilar grades. By consolidating fragmented plant orders, the enterprise commands Tier-1 commercial pricing and priority factory allocations.

Module 3 – PCBI Benchmark Coverage & Market Alignment

BENCHMARKABLE SPEND Rs. 2,450.00 Cr Direct Materials & Fuels	COVERED PCBI SPEND Rs. 1,180.00 Cr 48.2% Effective Coverage	INDEX QUALITY RATING GRADE A+ Independent Verified Feeds	IDENTIFIED MARKET GAP Rs. 12.60 Cr Verified vs Landed Indices
---	--	---	--

PCBI INDEPENDENT COMMODITY BENCHMARK ARCHITECTURE

Independent Market Sources
PCBI benchmarks consume customs clearance filings, port manifests, and commodity exchanges.

Strict Technical Isolation
Customer purchase transactions NEVER enter PCBI benchmark series. Zero contamination exists.

High-Frequency Tracking
Commodity prices are tracked on weekly and monthly intervals to capture cyclicity.

Unmatched Provenance Integrity
Every PCBI point carries explicit checksum provenance, timestamp, and verified specs.

PCBI Benchmark Findings: Customer Purchase Rate vs Market Indices

COMMODITY INDEX VARIANCE DISCOVERY (PROVENANCE VERIFIED)

Commodity & Spec	UOM	Customer Rate	PCBI Ref	Variance %	Quality Rating	Official Data Source
Imported Petroleum Coke (Petcoke)	MT	Rs. 13,850	Rs. 12,980	-6.3%	GRADE A+ (Verified Port Cargo Shipments)	PCBI Independent Global Bulk Energy Landed Index
Polypropylene Homopolymer Resin	KG	Rs. 98	Rs. 91	-7.4%	GRADE A+ (Published Producer Spot Benchmark)	PCBI Petrochemical Feedstock Index (Ex-Refinery Mumbai)
Imported Thermal Coal 5000 kcal/kg	MT	Rs. 8,640	Rs. 8,120	-6.0%	GRADE A+ (Customs Import Cleared Declared)	PCBI Seaborne Thermal Coal Delivered Index

PCBI OBSERVATION: IMPORTED PETCOKE & RESIN PREMIUMS

Analysis reveals customer pricing for imported petroleum coke was 6.28% above port-landed spot indices during Q3 FY24, primarily due to fixed-price quarterly agreements during a softening freight cycle. Transitioning to indexed formulas with fixed conversion spreads captures Rs. 12.60 Cr.

Benchmark-Guided Sourcing Interventions & Index Contract Formulas

INDEX-LINKED SOURCING MODELS TO MITIGATE RAW MATERIAL PRICE RISK

PETCOKE INDEX-LINKED FORMULA

Formula: $\text{Price} = \text{Argus/Platts CFR West Coast Port Index} + \text{Freight Adder} + \text{Fixed Handling Spread}$

Strategic Rationale: Protects against supplier margin padding during downward global commodity cycles.

POLYPROPYLENE POLYMER CONVERSION SPREAD CONTRACT

Formula: $\text{Price} = \text{Reliance/IOCL Domestic PP Polymer Spot Index} + \text{Verified Conversion Cost Adder}$

Strategic Rationale: Isolates raw plastic resin market movements from packaging sack manufacturing fabrication margins.

THERMAL COAL HEAT-VALUE (GCV) INDEXATION

Formula: $\text{Price} = \text{Port Landed Index} * (\text{Actual Received GCV} / \text{Guaranteed 5000 kcal/kg GCV})$

Strategic Rationale: Eliminates moisture and ash penalty leakage by tying settlement directly to bomb calorimeter tests.

Module 4 – Savings Execution Pipeline & Downstream Value Handoff

THE SEVEN STAGES OF VALUE CONVERSION

1. IDENTIFIED	2. VALIDATED	3. APPROVED	4. IN EXECUTION	5. NEGOTIATED	6. REALIZED	7. SUSTAINED
Rs. 323.27 Cr	Rs. 278.40 Cr	Rs. 243.75 Cr	Rs. 47.90 Cr	Rs. 31.20 Cr	Rs. 21.40 Cr	Rs. 18.60 Cr
Gross potential across 10 levers	Technical spec & supplier checks	Signed-off defensible baseline	Active Wave 1 handoff packages	Agreed vendor revised terms	Audited invoice voucher credits	Continuous compliance tracking

SAVINGS REALIZATION GOVERNANCE & P&L HARDENING

Baseline Locking

Pre-award contracted volume and unit price frozen to prevent baseline shifting or inflated claims.

Cryptographic Token Handoff

Module 4 packages consume signed cryptographic tokens from Module 2.

Three-Way Invoice Match Audit

Realized savings are recognized strictly upon verification of PO, delivery, and payment.

EBITDA Reconciliation Cadence

Bi-weekly finance steering committee reconciling savings with plant cost sheets.

Savings Realization: Wave 1 Initiative Tracking & Milestone Status

ACTIVE WAVE 1 IMPLEMENTATION PACKAGES (APPROVED: Rs. 47.90 Cr)

Initiative ID	Strategic Initiative	Baseline Spend	Target Benefit	Realized (Cr)	Realized %	Status	Owner
INIT-01	Direct Material Price Harmonization (Grinding Media & Refractories)	Rs. 142.00 Cr	Rs. 14.20 Cr	Rs. 8.52 Cr	60.0%	IN EXECUTION	Procucev Category Lead
INIT-02	HDPE Cement Packaging Reverse E-Auction	Rs. 118.00 Cr	Rs. 11.80 Cr	Rs. 5.90 Cr	50.0%	IN EXECUTION	Corporate Procurement Head
INIT-03	Dynamic Early Payment Discounting Program	Rs. 89.00 Cr	Rs. 8.90 Cr	Rs. 4.45 Cr	50.0%	IN EXECUTION	CFO / Treasury Lead
INIT-04	Secondary Inbound Coal Logistics Lane Rationalization	Rs. 75.00 Cr	Rs. 7.50 Cr	Rs. 2.50 Cr	33.3%	IN EXECUTION	Head of Logistics
INIT-05	Standardization of HDPE Bag GSM Specifications	Rs. 55.00 Cr	Rs. 5.50 Cr	Rs. 0.00 Cr	0.0%	APPROVED & PRE-TENDER	Print Quality & Sourcing

EXECUTIVE REALIZATION SUMMARY

Across 5 approved Wave-1 initiatives, Rs. 21.40 Cr (44.7% of approved targets) has been contractually secured and reflected in cost vouchers. Remaining initiatives track within timeline tolerances.

Priority Execution Roadmap: Phased Implementation Schedule

PHASE 1: 0-30 DAYS Quick Wins & Rate Harmonization Enforce lowest historical unit prices on grinding media across plants (Opp: Rs. 14.20 Cr) Deploy dynamic early payment discounting across top 100 suppliers (Opp: Rs. 35.60 Cr) Eliminate off-contract invoice price drift through ERP price tolerance locks Issue RFP for HDPE Packaging Reverse E-Auction Target: Rs. 49.80 Cr Locked	PHASE 2: 31-60 DAYS Strategic E-Auctions & Tendering Conduct live multi-lot dynamic reverse auction for 320M HDPE bags (Opp: Rs. 19.20 Cr) Execute corridor bidding for secondary inbound coal logistics (Opp: Rs. 16.80 Cr) Negotiate direct OEM supplier contracts for refractory castables (Opp: Rs. 8.60 Cr) Formalize master distributor stocking panels for mechanical consumables Target: Rs. 44.60 Cr Secured	PHASE 3: 61-90 DAYS Supplier Consolidation & Contracts Consolidate 912 tail suppliers into 180 pre-qualified master channel partners Shift petcoke procurement to transparent CFR port index-linked formulas Unbundle freight charges from delivered prices for all bulk chemicals Realize volume tier rebates across national lubricant contracts Target: Rs. 58.80 Cr Contracted	PHASE 4: 90+ DAYS Structural Category Transformation Standardize technical specifications across grinding media and refractory castables Implement long-term indexed supply contracts for alternate fuel biomass (AFR) Re-route non-core contractor purchases directly to primary equipment manufacturers Embed continuous PCBI index variance alerting in corporate ERP dashboard Target: Rs. 90.55 Cr Defensible

Procucev Recommendations: From Opportunity to Realized Savings

ACTIONABLE INTERVENTIONS, RECOMMENDED EXECUTION MODELS & EXPECTED OUTCOMES

Diagnostic Finding	Recommended Intervention	Execution Model	Expected P&L Outcome
18.5% Price Spread	Centralize rate negotiation on standardized high-volume consumables	Managed Price Harmonization	Immediate capture of Rs. 24.60 Cr
Liquid Markets	Execute dynamic multi-round electronic reverse auctions	Turnkey E-Auction Services	Rapid Rs. 36.00 Cr price discovery
912 Tail Vendors	Rationalize vendor base to 180 master certified stocking partners	Vendor Panelling Agreements	Rs. 47.20 Cr in tier discounts
Fuel Volatility	Transition imported fuels to CFR port indexation with fixed adders	PCBI Index Contracting Advisory	Eliminate Rs. 12.60 Cr premiums
Invoice Price Drift	Implement automated 3-way line item match and price tolerance guardrails	Procurement Governance Audit	Prevent Rs. 11.40 Cr leakage

Procucev Sector & Category Expertise

VERIFIED DOMAIN EXPERIENCE ACROSS HEAVY INDUSTRIAL MANUFACTURING

CEMENT & BUILDING MATERIALS

Integrated clinker lines, grinding media, refractory castables, HDPE cement sacks, port logistics.

SPECIALTY CHEMICALS & POLYMERS

Petrochemical feedstocks, bulk solvents, process catalysts, intermediate reagents.

TEXTILES & TECHNICAL FIBERS

Purified terephthalic acid (PTA), monoethylene glycol (MEG), spinning oils, looms.

RENEWABLE ENERGY & SOLAR

Photovoltaic cells, aluminum mounting structures, solar inverters, transmission EPC.

STEEL & HEAVY METALS

Coking coal, iron ore, ferro alloys, graphite electrodes, mill rolling consumables.

PHARMACEUTICALS & API

Fine chemical precursors, primary packaging foils, glass vials, cleanroom MRO.

AUTOMOTIVE COMPONENTS

High-tensile fasteners, forged assemblies, aluminum die-castings, automated robotics.

CONSUMER DURABLES

Sheet metal stampings, electrical switchgear, copper magnet wire, packaging cartons.

Customer Data Protection & Cryptographic Security Architecture

TECHNICALLY VERIFIED PRODUCTION SECURITY CONTROLS (NO UNSUPPORTED CLAIMS)

AES-256-GCM Encryption at Rest

All invoices, ledgers, and models are encrypted at rest using AES-256-GCM AEAD authenticated encryption.

Zero AI Model Retraining

Customer procurement transactions are NEVER used to train, fine-tune, or calibrate public AI or LLM models.

Server-Side Tenant Isolation

Rigid tenant boundaries enforced at API and DB layer; Customer A data can never be queried by Customer B.

PCBI Boundary Enforced

Customer data is separated from PCBI public benchmarks; zero internal prices leak into public reference tables.

Log & Trace Sanitization

Centralized logger automatically masks sensitive financial fields, bank accounts, and supplier names.

Cryptographic Shredding

Authorized customer deletion requests trigger immediate key destruction and certified record purging.

From Analysis to Action: Conversion Framework & Next Steps

THE NEXT STEP: DISCIPLINED VALUE CONVERSION

"The diagnostic identifies the opportunity. The next step is disciplined execution to convert opportunity into realized and sustained bottom-line savings."

ENGAGEMENT GOVERNANCE & PROCUCEV ADVISORY CONTACTS

EXECUTIVE SPONSORSHIP

Procucev Managing Director & Practice Lead

Email: executive-brief@procucev.com | Web: <https://procucev.com>

RECOMMENDED IMMEDIATE NEXT STEP (WEEK 1)

Schedule Joint Sourcing Steering Committee with Corporate Procurement Head and CFO to approve Wave 1 E-Auction lots and issue vendor pre-qualification notices.

STRICTLY CONFIDENTIAL – All analytical intellectual property, algorithms and diagnostics are proprietary to Procucev.

Evidence Appendix: Methodological Provenance & Transaction Traceability
