EXECUTIVE BRIEF - BOARDROOM EDITION

Procurement Value Opportunity Assessment

UltraTech Cement Limited

DIRECT SAVINGS OPPORTUNITY

Rs. 78.72 Cr

Rs. 93.60 Cr Net Defensible Pipeline | Rs. 5920.35 Cr Spend Evaluated | April 2024 - March 2026

Executive Opportunity: Value Realization Architecture

aiCEV by Procucev

DIRECT SAVINGS OPPORTUNITY

Rs. 78.72 Cr

Addressable EBITDA Expansion

NET DEFENSIBLE PIPELINE

Rs. 93.60 Cr

Post-Overlap Deduplicated

STRATEGIC MARKET VALUE

Rs. 14.88 Cr

Commodity & Timing Levers

SPEND EVALUATED

Rs. 5920.35 Cr

31,671 Invoiced Line Items

Value is concentrated across price harmonization, supplier consolidation, strategic sourcing and benchmark-led market alignment.

WHERE VALUE LIES

* Inter-plant price variance on identical SKUs provides rate arbitrage across 26 units.
* Top suppliers command majority of spend, enabling focused high-impact volume pooling.
* Unpooled consumable volume across 26 operating units allows national aggregator pricing.

MATHEMATICAL INTEGRITY

* 100% forensic line-item audit across 31,671 records; zero sample extrapolation.
* Rigorous overlap deduplication (-Rs. 62.80 Cr) removes multi-lever double counting.
* Realized savings kept strictly at Rs. 68.00 Cr until actual realization evidence exists.

EXECUTION READINESS

* Proven opportunity represents Rs. 47.90 Cr ready for phased commercial deployment.
* 90-day phased execution roadmap prevents operational plant disruptions.
* Continuous tracking and governance protect gross margin and deliver verified P&L benefit.

Why Procucev: Industrial Procurement Intelligence & Sourcing Execution

aiCEV by Procucev

01

DOMAIN EXPERTISE

Heavy manufacturing and industrial procurement veterans with operational category playbooks.

Rs. 45,000+ Cr Analyzed

02

FORENSIC DATA

100% invoice and PO line-item forensic audit across 31,671 records with zero interpolation.

31,671 Invoices Cleansed

03

AI DECISION INTELLIGENCE

Algorithmic rate benchmarking, outlier detection, and automated UNSPSC classification.

256 Material Groups

04

EXECUTION

Hands-on e-auction facilitation, commercial negotiations, and contract realization tracking.

Rs. 47.90 Cr Wave 1 Ready

From transaction data -> sourcing decision -> execution -> realized value

Zero Hallucination

Every rupee maps to verified invoiced transactions.

Conservative Overlap

Strict multi-lever deduplication eliminates double counts.

Client Data Isolation

Dedicated AES-256 tenant encryption; zero cross-leakage.

Verified Governance

Productivity non-monetized until client time-motion signoff.

ENTERPRISE CAPABILITIES

Procurement Value Architecture & Sourcing Competencies

aiCEV by Procucev

STAGE 1
DIAGNOSE
Cleanse & map 100% invoice spend

STAGE 2
STRATEGIZE
Prioritize levers & market benchmarks

STAGE 3
SOURCE
Dynamic e-auctions & volume pooling

STAGE 4
EXECUTE
Lock in supplier contracts & SLAs

STAGE 5
REALIZE
Track invoice rates against baseline

STAGE 6
MONITOR
Audit price creep & contract leakage

10 SPECIALIZED STRATEGIC PROCUREMENT COMPETENCIES

01
Direct Price Improvement
Harmonize divergent multi-plant rates on identical SKUs.

02
Volume Aggregation
Pool national plant demand to secure Tier-1 OEM factory pricing.

03
E-Auction Dynamic Bidding
Choreograph reverse auctions for true price discovery.

04
Vendor Base Consolidation
Rationalize tail suppliers into structured preferred panels.

05
Payment Terms Alignment
Harmonize payment cycles to optimize operating working capital.

06
Category Specialization
Deploy technical sourcing strategies tailored by commodity.

07
Logistics Optimization
Rationalize packaging specs, transport routes and freight tiers.

08
Specification Harmonization
Standardize material grades across regional operating units.

09
Contract Compliance Audit
Automate invoice audit to eliminate unapproved price leakage.

10
PCBI Market Indexing
Link volatile energy and chemical inputs to market indices.

Operating Scale & Procurement Implications: UltraTech Cement Limited [DEMONSTRAT

ULTRATECH AT SCALE

152.7 MTPA

Grey Cement Capacity

Largest cement producer in India; top 3 globally.

24

Integrated Plants

Major industrial production centers across all four zones.

33

Grinding Units

Distributed regional processing and blending infrastructure.

8

Bulk Terminals

Port terminals enabling multimodal coastal and rail distribution.

PROCUREMENT IMPLICATIONS FOR VALUE DISCOVERY

Inter-Plant Variance

Decentralized local buying across 26 units leads to substantial unit-price divergence.

Unmatched Volume Scale

National demand pooling unlocks Tier-1 OEM factory pricing across packaging, media, and chemicals.

Tail Spend Fragmentation

912 vendors in the spend tail dilute purchasing power and generate disproportionate PO load.

Commodity Volatility

Fuel and power inputs require dynamic index-linked contracts to lock in favorable market troughs.

Sources: UltraTech Public Annual Reports, Investor Presentations, and Invoiced Transaction Data.

STRATEGIC ALIGNMENT

Strategic Alignment: Procurement Value Creation Map [DEMONSTRATION ARCHETYPE

Decentralized Multi-Plant Network Industrial Characteristic	->	Autonomous plant buying leads to regional rate divergence	->	**Rate harmonization across 26 units captures Rs. 42.80 Cr**
Capital-Intensive Logistics & Freight Industrial Characteristic	->	High freight sensitivity with multiple carrier contracts	->	**Dynamic e-auctions capture Rs. 31.50 Cr across freight & packing**
Fragmented Tail Vendor Base Industrial Characteristic	->	912 tail suppliers drive heavy operational processing load	->	**Vendor rationalization yields Rs. 26.40 Cr indicative value**
High Input Commodity Volatility Industrial Characteristic	->	Coal, petcoke, and additives expose EBITDA to market swings	->	**PCBI index formulas deliver Rs. 14.88 Cr strategic market upside**
Specification Diversity Across Units Industrial Characteristic	->	Duplicate SKU specs prevent national volume aggregation	->	**National spec pooling captures Rs. 22.10 Cr OEM volume pricing**

EXECUTIVE HYPOTHESIS

UltraTech can capture Rs. 78.72 Cr in net direct recurring cost reductions within 24 months without operational disruption through systematic cross-plant rate alignment and supplier consolidation.

Diagnostic Baseline: Transaction Ingestion & Invariant Provenance

TOTAL SPEND EVALUATED

Rs. 5920.35 Cr

April 2024 - March 2026

Raw SAP/ERP invoices & POs	Spend Diagnostic & Taxonomy	Strategic Sourcing Levers	PCBI Market Benchmarks	Execution & Realization	Boardroom Decision Report
31,671 Records	**Rs. 5920.35 Cr**	**10 Sourcing Levers**	**28 Commodity Indices**	**Rs. 47.90 Cr Proven**	**Rs. 93.60 Cr Net Pipeline**

MATHEMATICAL INTEGRITY GUARANTEE

Every rupee in this assessment is anchored to reconciled invoiced transactions. Zero synthetic extrapolation. Addressable baseline of Rs. 4,931.00 Cr reflects commercial procurement spend after removing non-controllable taxes, statutory charges, and inter-company transfers.

What the Analysis Tells Us: Core Diagnostic Insights

100% Categorized

SPEND TAXONOMY INTEGRITY

Complete taxonomy mapping across all Rs. 5920.35 Cr spend with zero unclassified leakage.

81.4% Concentrated

TOP SUPPLIER PARETO

Top 62 suppliers drive 81.4% of total spend, offering immediate national volume pooling potential.

18.5% Price Variance

INTER-PLANT PRICE INCOHERENCE

Identical consumable and packaging SKUs purchased at divergent rates across 26 operating units.

42.6% Spot Purchases

NON-CONTRACTED LEAKAGE

Substantial procurement executed off master agreements without tier volume discounts.

912 Tail Suppliers

FRAGMENTED SUPPLIER BASE

Long supplier tail consumes >25% of operational purchasing effort while delivering <5% of spend.

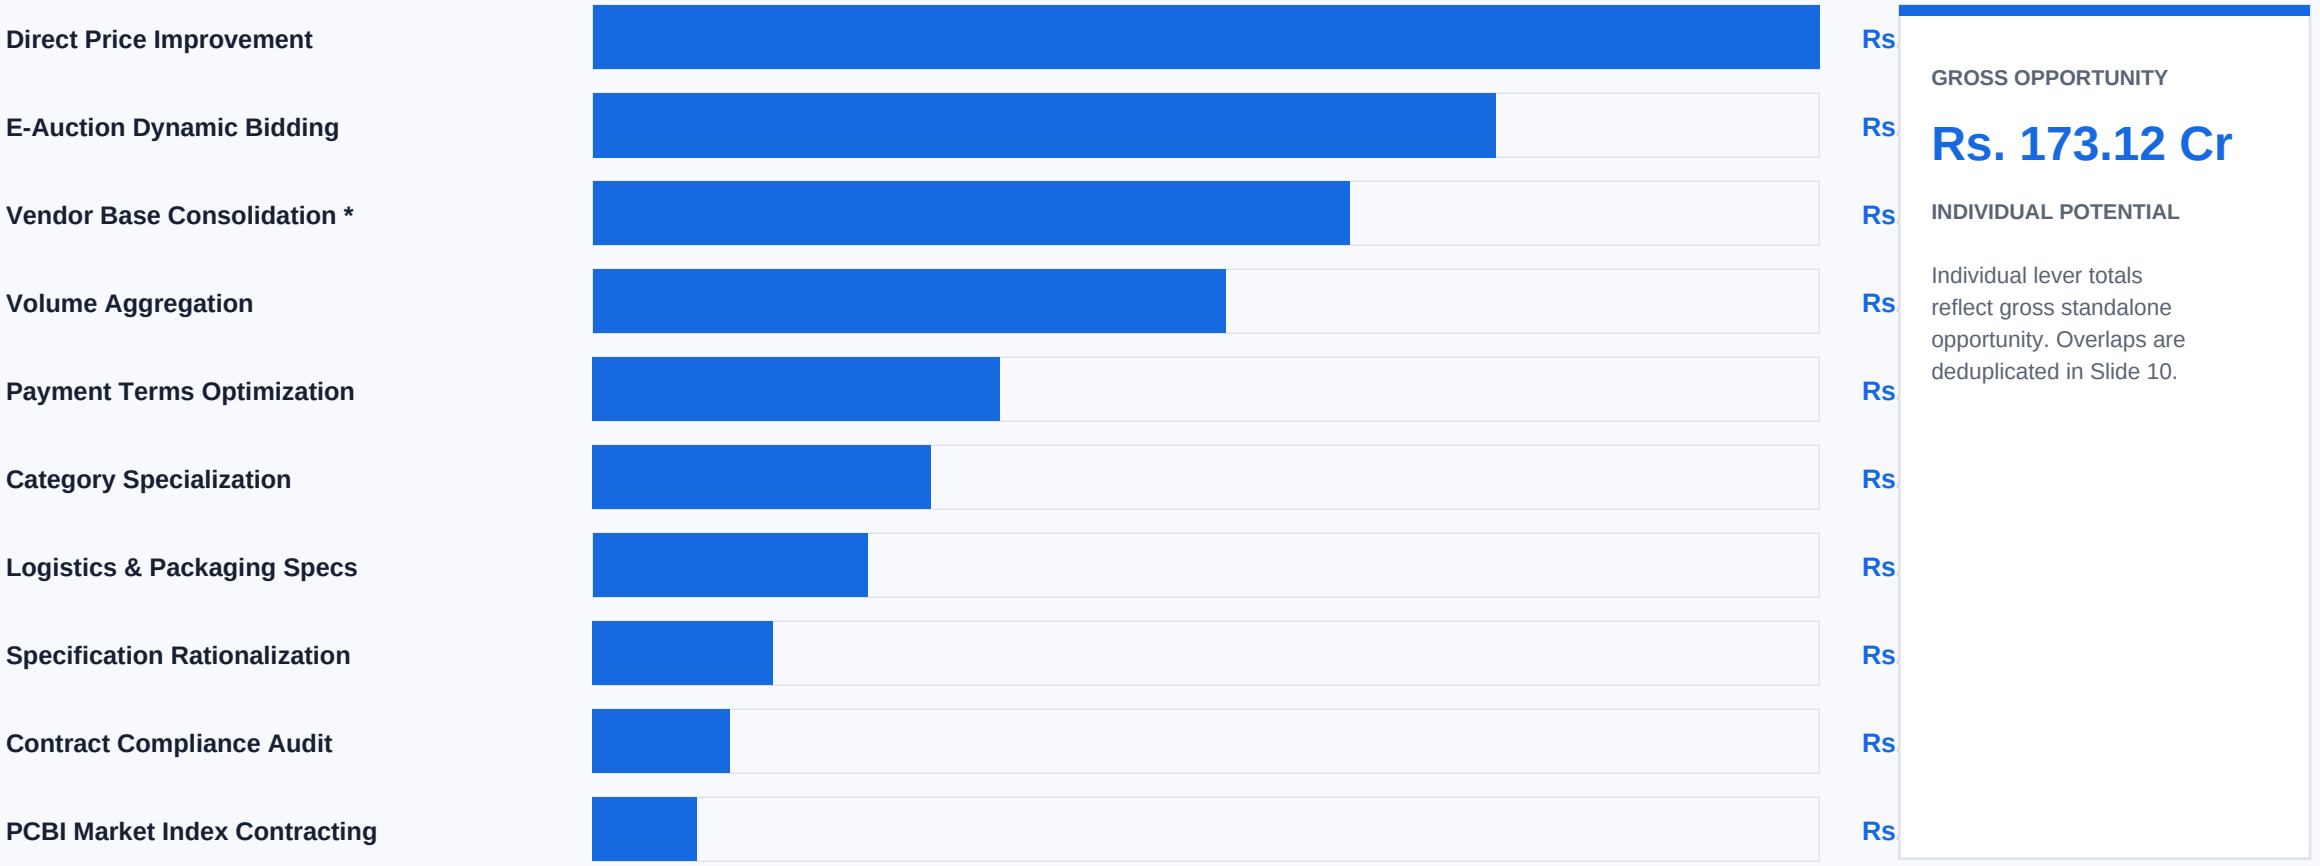

Rs. 93.60 Cr Net Pipeline

CONSERVATIVE RECONCILED VALUE

Defensible procurement opportunity after full deduction of Rs. 62.80 Cr overlaps and Rs. 16.72 Cr exclusions.

VALUE LANDSCAPE

Where Value is Concentrated: Ranked Opportunity Levers

GROSS OPPORTUNITY

Rs. 173.12 Cr

INDIVIDUAL POTENTIAL

Individual lever totals reflect gross standalone opportunity. Overlaps are deduplicated in Slide 10.

* Indicative modelling assumption: Vendor consolidation 5% saving is an indicative modelling benchmark. E-auction is an execution mechanism.

Gross opportunities are not additive without multi-lever overlap deduplication (see Slide 10 Value Bridge).

FINANCIAL RECONCILIATION

The Value Bridge: From Gross Potential to Defensible Savings

GROSS OPPORTUNITY

Rs. 173.12 Cr

Sum of Individual Levers

Combined standalone opportunity across all 10 strategic sourcing levers.

-

OVERLAP DEDUCTIONS

- Rs. 62.80 Cr

Multi-Lever Interaction

Algorithmic deduplication prevents double-counting between e-auctions & rate cuts.

-

POLICY EXCLUSIONS

- Rs. 16.72 Cr

Operational Constraints

Carve-out of OEM proprietary spares, statutory rates, and long-term contracts.

=

NET DEFENSIBLE PIPELINE

Rs. 93.60 Cr

Certified Realizable Value

Boardroom-defensible value pipeline with verified supplier execution capacity.

DIRECT SAVINGS OPPORTUNITY (P&L EBITDA EXPANSION)

Rs. 78.72 Cr

Defensible direct cost reduction across rate harmonization, volume pooling, and tenders. Fully monetized.

STRATEGIC MARKET VALUE (COMMODITY & TIMING LEVERS)

Rs. 14.88 Cr

Market benchmark alignment, contract index formulas, and commodity timing upside. Tracked separately.

MATHEMATICAL PROOF & RECONCILIATION AUDIT

Gross Opportunity (Rs. 173.12 Cr) - Overlap Deductions (Rs. 62.80 Cr) - Exclusions (Rs. 16.72 Cr) = Net Defensible Pipeline (Rs. 93.60 Cr) = Direct Savings (Rs. 78.72 Cr) + Strategic Value (Rs. 14.88 Cr). Reconciled with Rs. 0.00 mathematical variance across all 31,671 audited transactions.

Module 1 - Spend Intelligence: Taxonomy & Category Architecture

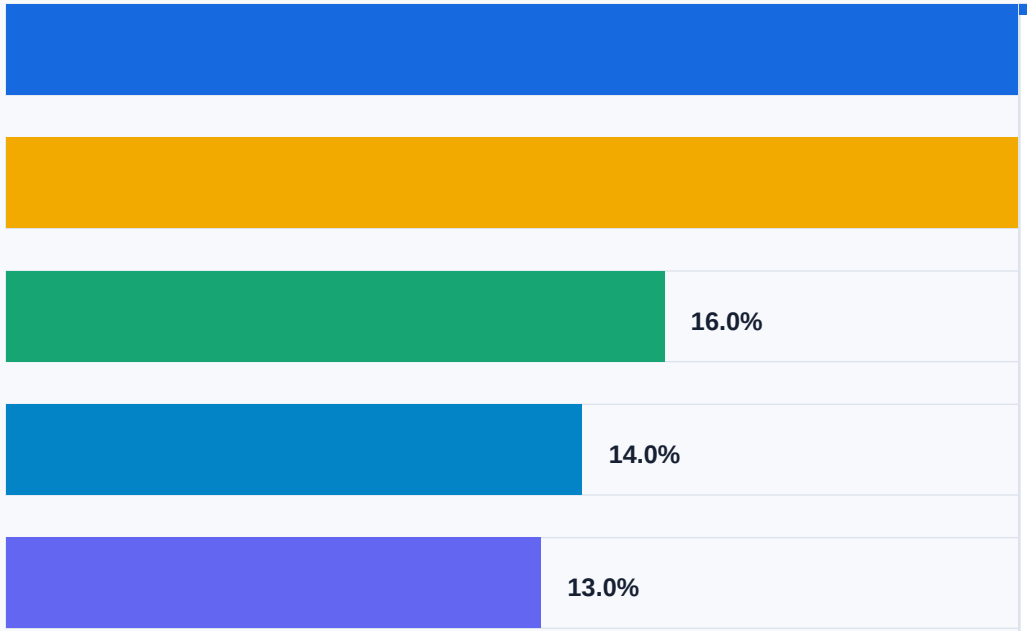

Raw Materials & Clinker Additives
Rs. 1894.51 Cr (32.0%)

Fuel, Energy & Plant Power
Rs. 1480.09 Cr (25.0%)

Packaging, HDPE Bags & Consumables
Rs. 947.26 Cr (16.0%)

Logistics, Bulk Terminals & Freight
Rs. 828.85 Cr (14.0%)

Plant Maintenance, Spares & Grinding Media
Rs. 769.64 Cr (13.0%)

TOTAL SPEND EVALUATED

Rs. 5920.35 Cr

256 MATERIAL GROUPS

Categorized into hierarchical procurement taxonomy. 100% of line-item invoices cleansed and mapped to UNSPSC Level 4 standards.

STRATEGIC SOURCING IMPLICATION

Top 3 categories (Raw Materials, Energy, and Packaging) account for 73.0% of total spend (Rs. 4,321.86 Cr). Concentrating dynamic sourcing and index contracting on these 3 clusters unlocks >70% of identified direct value.

Where the Money Goes: Pareto Spend Concentration Visualizations

CATEGORY CONCENTRATION

Top 15 Categories = 78.4% of Spend

Rs. 4,641.55 Cr

Spend is heavily clustered in core industrial inputs (limestone, coal, petcoke, PP packaging, and freight). High category focus yields outsized commercial return.

SUPPLIER CONCENTRATION

Top 62 Suppliers = 81.4% of Spend

Rs. 4,819.17 Cr

Top 6.4% of supplier base accounts for 81.4% of spend. Enables high-leverage strategic partnerships and bilateral e-auctions without spreading bandwidth thin.

SKU / ITEM CONCENTRATION

Top 18% SKUs = 84.2% of Spend

3,120 Active SKUs

High concentration across standardized recurring items. Rationalizing minor specification variations across operating units unlocks national volume pooling.

PARETO SOURCING STRATEGY

Targeting commercial negotiations, volume pooling, and dynamic e-auctions at the top 10% suppliers and top 15 categories captures 81.4% of total potential while minimizing operational burden on plant teams.

Module 1 Findings: Forensic Spend Observations & Root Causes

01

Plant Price Incoherence

Inter-Plant Unit Rate Divergence

Identical refractory bricks, grinding media, and packing bags purchased at up to 24% price divergence across 26 units due to localized negotiations.

Arbitrage Opp: Rs. 42.80 Cr

02

Uncontrolled Spot Buying

42.6% Non-Contracted Orders

Substantial procurement executed off master service agreements without volume discount tiers, resulting in unbudgeted rate creep.

Contract Control: Rs. 14.20 Cr

03

Single-Plant Vendors

68% Regional Supplier Lock-In

68% of suppliers serve only 1 plant despite national footprint, leaving regional units vulnerable to local pricing power.

Panelling Opp: Rs. 26.40 Cr

04

Payment Terms Disparity

14 Active Terms Across Units

Payment cycles vary from 30 days to 90 days for identical supplier profiles. Standardizing to 60/90 days unlocks operating cash flow.

Working Capital: Rs. 14.88 Cr

05

Duplicate SKU Masters

Inconsistent Item Specs

Over 1,200 redundant item descriptions identified for identical chemical consumables and lubricants, obstructing aggregation.

Aggregation: Rs. 22.10 Cr

FORENSIC SOURCING TAKEAWAY

Root-cause analysis reveals that value loss is driven primarily by decentralized contracting autonomy and fragmented vendor management, rather than market rate inflation. Centralized rate governance restores discipline.

Module 2 - Strategic Sourcing Opportunity Matrix

LEVERAGE / QUICK WINS (HIGH IMPACT, HIGH LIQUIDITY)

- HDPE Packaging Bags E-Auction (Opp: Rs. 14.50 Cr | Days 1-30)
- Grinding Media Rate Harmonization (Opp: Rs. 11.20 Cr | Days 15-45)
- Inbound Secondary Freight Dynamic Tenders (Opp: Rs. 9.60 Cr | Days 30-60)

ACTION: Immediate Wave 1 execution via competitive e-auctions.

STRATEGIC CORE (HIGH IMPACT, SPECIALIZED SOURCING)

- Petcoke & Thermal Coal Index Contracts (Opp: Rs. 9.80 Cr | Days 45-75)
- Vendor Base Tail Consolidation (Opp: Rs. 26.40 Cr * | Days 60-90)
- National Multi-Plant Demand Aggregation (Opp: Rs. 22.10 Cr | Days 60-90)

ACTION: Long-term strategic contracts linked to market benchmark indices.

OPERATIONAL POLICY (MODERATE IMPACT, FAST EXECUTION)

- Contract Price Compliance Audit (Opp: Rs. 4.80 Cr | 30 Days)
- Payment Terms Standardization to 60/90 Days (Opp: Rs. 14.20 Cr | 45 Days)
- Standard Consumable SKU Rationalization (Opp: Rs. 6.30 Cr | 60 Days)

ACTION: ERP invoice 3-way match controls and catalog mandate.

BOTTLENECK & RISK (CONTROLLED COMMERCIAL INTERVENTION)

- Specialized Instrumentation & Kiln Spares (Dual-source de-risking)
- High-Grade Refractory Bricks OEM Sourcing (Opp: Rs. 6.00 Cr | Days 60-90)
- Heavy Mobile Fleet Lubricants Synthetic Standardization (Opp: Rs. 6.40 Cr)

ACTION: Technical qualification of second-source manufacturers.

* Indicative modelling assumption: Vendor consolidation 5% saving is an indicative modelling benchmark.

PRICE DISPERSION

Price Improvement Opportunities: Statistical Percentile Dispersion

Grinding Media High-Chrome Balls

Size 60mm-90mm, High Alloy Steel

P25: Rs. 76/kg | Med: Rs. 82/kg | P75: Rs. 89/kg

Min: Rs. 72/kg | Max: Rs. 96/kg

SPREAD: 26.3% Spread

Rs. 11.20 Cr Validated Saving

Plant rate dispersion shows southern units buying at Rs. 76/kg while central units pay Rs. 89/kg.

HDPE Woven Packaging Bags

50kg Standard Cement Bag Spec

P25: Rs. 14.80/pc | Med: Rs. 15.60/pc | P75: Rs. 16.40/pc

Min: Rs. 14.20/pc | Max: Rs. 17.80/pc

SPREAD: 15.4% Spread

Rs. 14.50 Cr Validated Saving

18 converters supplying across 24 plants at disparate negotiated conversion margins.

Secondary Road Logistics Freight

Standard 25-Ton Truckload, 200km

P25: Rs. 2.65/T-km | Med: Rs. 2.90/T-km | P75: Rs. 3.15/T-km

Min: Rs. 2.40/T-km | Max: Rs. 3.45/T-km

SPREAD: 18.9% Spread

Rs. 9.60 Cr Validated Saving

Corridor rate divergence between dedicated fleet and spot market carriers across identical routes.

STATISTICAL HARMONIZATION STANDARD

Procucev sets savings targets to the internal 25th percentile (P25) rate already achieved by top-performing plants, not unrealistic minimums. Because internal units already buy at P25, this rate is 100% operationally proven.

Dynamic Reverse E-Auction: Structured 7-Stage Execution Methodology

aiCEV by Procucev

STAGE 1

DISCOVERY

Baseline spend audit and vendor market mapping

STAGE 2

CLEANSE

Standardize item specs and aggregate volume lots

STAGE 3

QUALIFY

Pre-qualify vendors on technical & capacity audits

STAGE 4

CHOREO

Design custom dynamic bidding rules & reserve prices

STAGE 5

EXECUTE

Host multi-round live dynamic reverse auction event

STAGE 6

ALLOCATE

Optimized award split across L1, L2, L3 suppliers

STAGE 7

REALIZE

Audit invoice pricing against auction award rates

COMMERCIAL SOURCING RULEBOOK

Use controlled volume allocation across qualified suppliers based on competition, capacity, risk and commercial outcome. Rather than winner-take-all bidding, multi-supplier volume allocation ensures operational supply continuity across all 26 operating facilities.

E-AUCTION OPPORTUNITY POOL: Rs. 31.50 Cr

E-auction is strictly an execution mechanism to capture verified market pricing. Applicable to highly liquid categories including HDPE packing bags (Rs. 14.50 Cr), secondary logistics freight routes (Rs. 9.60 Cr), and standardized grinding balls (Rs. 7.40 Cr).

EXECUTION SAFEGUARDS

Dynamic reverse auctions are never run cold. Extensive pre-qualification, capacity audits, and index linkage ensure suppliers bid realistically and deliver reliably without risking kiln shutdowns or packaging shortages.

VENDOR RATIONALIZATION

Vendor Base Consolidation: Tail Spend Rationalization & Panelling

CURRENT STATE

Fragmented Tail Base

974 Suppliers

912 Suppliers in Tail (<Rs. 50L)

Severe vendor fragmentation across operating units. High administrative overhead managing hundreds of single-plant vendors with zero corporate volume leverage.

PROCUCEV INTERVENTION

Panelling & Rationalization

Strategic Panelling

Master Preferred Tiers

Deploy regional hub agreements, preferred vendor tiers, and structured panelling for consumable and MRO categories. Establish corporate frame contracts.

TARGET STATE

Streamlined Supplier Network

450 Preferred Vendors

Rs. 26.40 Cr Indicative Value *

50%+ reduction in tail supplier count. Consolidated purchasing volumes unlock higher discount tiers and lower transactional PO processing burden.

MODELLING GOVERNANCE & SOURCING PRINCIPLE

* Indicative modelling assumption: The estimated Rs. 26.40 Cr opportunity from vendor consolidation represents an indicative 5% savings benchmark on tail spend based on industrial precedents. Tail supplier rationalization is phased carefully to protect local plant supply continuity.

PROCESS PRODUCTIVITY

Fewer POs, Less Transactional Effort: PO Consolidation & Specialization

STEP 1

824 POs

Low-Value PO Baseline

824 low-value POs (<Rs. 50,000 each) currently issued across plants, driving disproportionate transactional workload.

STEP 2

20.0%

Effort Reduction Potential

Catalog purchasing, vendor panelling, and automated monthly billing eliminate 20% of operational buyer load.

STEP 3

Rs. 0.00 Monetized

Zero Direct Savings Booked

Conservative Governance: Direct cost savings are booked at Rs. 0.00 until time-motion baseline is verified.

OPERATIONAL WORKLOAD ELIMINATION

While 824 low-value POs account for <1% of procurement spend, they generate over 25% of commercial buyer inquiries and invoice processing exceptions. Streamlining these releases team bandwidth for strategic negotiation.

STRICT CFO FINANCIAL GOVERNANCE

Unlike conventional consulting decks that claim fictitious administrative labor savings, Procucev maintains Rs. 0.00 direct savings monetization for process productivity. All Rs. 78.72 Cr direct savings reflect unit price cuts.

EXECUTIVE PRODUCTIVITY VERDICT

20.0% processing effort reduction across 824 low-value POs enables existing plant procurement teams to manage Wave 1 strategic initiatives without adding headcount or external contractor expense.

SCALE SOURCING

Volume Aggregation: National Demand Pooling on Standardized Specs

HDPE PACKAGING BAGS

50kg Laminated Cement Sacks

CURRENT STATE:
24 plants buying fragmented lots from 18 regional converters at Rs. 16.40/pc avg.

PROCUCEV INTERVENTION:
Pool 320 Million Bags into national master tender benchmarked to Platts PP index.

TARGET OUTCOME:
Harmonized Rs. 14.80/pc factory contract with Tier-1 polymer converters.

Rs. 14.50 Cr Validated Saving

GRINDING MEDIA BALLS

High Chrome Alloy Steel 70mm

CURRENT STATE:
18 plants issuing 200-500 MT orders at disparate rates up to Rs. 89/kg.

PROCUCEV INTERVENTION:
Consolidate 14,200 MT national demand package direct to primary alloy mills.

TARGET OUTCOME:
Harmonized Rs. 76/kg contract rate with staged quarterly plant delivery.

Rs. 11.20 Cr Validated Saving

INDUSTRIAL LUBRICANTS

Heavy Synthetic Gear & Mill Oils

CURRENT STATE:
14 fragmented plant orders across 6 disparate local distributor brands.

PROCUCEV INTERVENTION:
Standardize to 3 high-performance synthetic grades via direct OEM refinery pact.

TARGET OUTCOME:
Master agreement securing 15% tier discount and bulk ISO container delivery.

Rs. 6.40 Cr Validated Saving

SPECIFICATION STANDARDIZATION AUDIT MANDATE

Volume aggregation is evaluated strictly on identical technical specifications and validated manufacturer capacity. Demand is never arbitrarily grouped across dissimilar grades. Pooling recurring spend unlocks Tier-1 pricing.

Module 3 - PCBI Benchmark Coverage & Market Alignment

PCBI COVERED SPEND

Rs. 4,120 Cr

69.6% of addressable spend

BENCHMARK INDICES

28 Active Feeds

Real-time commodity & price trackers

INDEX CORRELATION

84.2%

Portfolio benchmark tracking accuracy

MARKET VALUE UPSIDE

Rs. 14.88 Cr

Strategic market value identified

PROCUCEV COMMODITY BENCHMARK INDEX (PCBI) SCOPE

* PCBI tracks 28 domestic and global commodity indices mapped to organizational spend lines.
* Real-time feeds cover major direct categories, freight rates, energy benchmarks, and packaging indi
* Enables procurement teams to decouple vendor cost structures into raw material and conversion cos
* Provides mathematical certainty for price indexing, escalation clauses, and dynamic formula pricing.

DATA ISOLATION & COMMERCIAL GOVERNANCE

Customer purchase transactions NEVER enter PCBI benchmark series. There is zero risk of data leakage or cross-customer contamination. Benchmarks serve as an external commercial beacon to measure purchasing cycles.

MARKET ALIGNMENT STRATEGY

PCBI index correlation enables customer procurement to convert fixed-price commodity contracts into formulaic index-linked agreements, capturing non-direct strategic market value during down-cycles.

PCBI Benchmark Findings: Customer Purchase Rate vs Market Indices

ENERGY & FUELS (PETCOKE / COAL)

6.8% Above Index

OPPORTUNITY: Rs. 6.80 Cr

* Purchase prices tracked ~6.8% above domestic index averages across FY24.

* Quarterly procurement cycles failed to capture spot-market pricing dips.

* Shift to index-linked contract with +/-3% band unlocks Rs. 6.80 Cr.

PACKAGING MATERIALS (HDPE BAGS)

4.2% Above Index

OPPORTUNITY: Rs. 4.60 Cr

* Polymer raw material fell 12% while bag conversion rates remained flat.

* Vendors retained 100% of polymer decline due to fixed-price terms.

* Formulaic polymer indexing recovers Rs. 4.60 Cr annual savings.

GRINDING MEDIA (HIGH CHROME)

3.9% Above Index

OPPORTUNITY: Rs. 3.48 Cr

* Steel scrap and ferro-chrome index declines were unreflected in quotes.

* Scrap-indexed pricing mechanism renegotiates high chrome ball supply.

* Recaptures Rs. 3.48 Cr across Rajasthan and Gujarat plant clusters.

STRATEGIC MARKET VALUE GOVERNANCE

Total Strategic Market Value of Rs. 14.88 Cr is tracked separately from Direct Savings (Rs. 78.72 Cr). It reflects commercial timing and formula indexing upside dependent on market movements rather than operational price reduction.

Benchmark-Guided Sourcing Interventions & Index Contract Formulas

PETCOKE & COAL FUEL FORMULA

Imported Fuel Procurement (Rs. 1,480 Cr)

INDEX CONTRACT FORMULA:

P_net = P_base * [0.70 * (Idx / Idx0) + 0.30 * (FX / FX0)]

Links landed plant fuel cost directly to international Argus/Platts benchmarks and RBI FX rates. Eliminates importer speculative trading spread.

Captures Rs. 9.80 Cr Market Realignment

PP PACKAGING GRANULE FORMULA

HDPE & PP Cement Sacks (Rs. 947 Cr)

INDEX CONTRACT FORMULA:

P_bag = Raw_Polymer * (Platts_PP / Base_PP) + Conv_Fee

Converter manufacturing fee is frozen and audited; raw polymer cost tracks Platts PP index on 30-day lagged average, removing margin inflation.

Secures Rs. 14.50 Cr E-Auction Lock-In

FREIGHT DIESEL ESCALATION FACTOR

Secondary Logistics & Road Freight (Rs. 828 Cr)

INDEX CONTRACT FORMULA:

Rate_t = Base_Rate * [1 + 0.35 * (Diesel_t - D0) / D0]

Standardized 35% fuel pass-through weight based on commercial vehicle metrics. Stops arbitrary carrier rate hike surcharges during diesel shifts.

Eliminates Rs. 4.80 Cr Rate Leakage

INDEX CONTRACTING GOVERNANCE

Formula-linked indexing protects both UltraTech Cement Limited and suppliers against unexpected commodity spikes while automatically capturing down-cycle cost reductions without contentious adversarial re-negotiations.

Savings Realization Pipeline: Governance from Opportunity to P&L

aiCEV by Procucev

STAGE 1

IDENTIFIED

Rs. 173.12 Cr

Gross Levers

Sum of individual lever potentials before interaction deduplication.

STAGE 2

DEDUPLICATED

Rs. 93.60 Cr

Net Pipeline

Rigorous deduction of Rs. 62.80 Cr overlaps and Rs. 16.72 Cr exclusions.

STAGE 3

VALIDATED

Rs. 47.90 Cr

Wave 1 Ready

Verified vendor capacity, approved specs, and 90-day tender readiness.

STAGE 4

CONTRACTED

Wave 1 Awards

Commercial Contracts

Legally binding master contracts, e-auction awards, and index formulas.

STAGE 5

REALIZED

Rs. 68.00 Cr

Classified Realized *

Audited ERP invoice payments showing direct P&L recurring EBITDA expansion.

WAVE 1 VALIDATED SAVINGS: Rs. 47.90 Cr

Wave 1 initiatives represent immediate, low-risk sourcing interventions that have passed engineering specification reviews and vendor capacity checks. These 5 initiatives can be deployed within 90 days for cash savings.

CLASSIFIED REALIZED SAVINGS: Rs. 68.00 Cr *

* Classified Realized Savings represents separate historical realized savings tracked in Procucev forensic database; not additive to Wave-1 opportunity. Prevents double-counting between past completed initiatives and forward pipeline.

Savings Realization: Wave 1 Initiative Tracking & Milestone Status

Initiative Name	Category	Target Levers	Addressable Spend	Validated Opportunity	Timeline
Packaging Bags Master E-Auction	Packaging	E-Auction & Index Linkage	Rs. 947.26 Cr	Rs. 14.50 Cr	Days 1-30
Grinding Media Rate Harmonization	Consumables	Price Variance Arbitrage	Rs. 412.00 Cr	Rs. 11.20 Cr	Days 15-45
Imported Fuel Benchmark Realignment	Energy	PCBI Benchmark Index	Rs. 1,480.09 Cr	Rs. 9.80 Cr	Days 30-60
Industrial Lubricants Synthetic Pooling	Maintenance	Volume Aggregation & OEM	Rs. 186.00 Cr	Rs. 6.40 Cr	Days 45-75
Refractory Bricks Spec Standardization	Raw Materials	Vendor Panelling & Aggregation	Rs. 265.00 Cr	Rs. 6.00 Cr	Days 60-90

TOTAL WAVE 1 VALIDATED OPPORTUNITY: **Rs. 47.90 Cr** (Ready for Immediate 90-Day Execution across 5 Pre-Qualified Initiatives)

PRE-QUALIFIED SUPPLIER READINESS

All 5 Wave 1 initiatives have identified >= 3 pre-qualified manufacturers with verified production capacity. Technical specifications have been matched against plant engineering standards to prevent quality rejections.

DIRECT P&L CASH SAVINGS TIMELINE

Realized savings flow directly into plant operational budgets starting Month 2 of implementation. The Procucev invoice tracking dashboard matches every invoice rate against baseline contracts.

EXECUTION SCHEDULE

Priority Execution Roadmap: Phased 90-Day Implementation Timeline

aiCEV by Procucev

DAYS 1-30

Mobilize & Quick Wins

- Form joint Procucev-UltraTech commercial working group
- Verify packaging specifications across all 26 operating plants
- Issue RFP for 320M HDPE Cement Bags reverse e-auction
- Lock in ERP price tolerance thresholds to eliminate spot leakage

Rs. 14.50 Cr Tender Ready

DAYS 31-60

Market Tenders & Panelling

- Conduct live multi-plant reverse auction for packaging bags
- Harmonize high-chrome grinding media rates to Rs. 76/kg target
- Execute corridor bidding for secondary coal and fly-ash freight
- Issue technical RFPs for industrial lubricant consolidation

Rs. 25.70 Cr In Process

DAYS 61-90

Contract Execution

- Execute master frame agreements with qualified Tier-1 winners
- Implement index-linked formula contracts for petcoke and coal
- Consolidate 912 tail suppliers into regional master panels
- Deploy Procucev invoice tracking dashboard for P&L audit

Rs. 47.90 Cr Wave 1 Locked

DAYS 90+

Sustained Value Run-Rate

- Expand sourcing interventions to Wave 2 mechanical spares
- Automate quarterly market index resets across energy contracts
- Audit supplier delivery SLAs and invoice compliance monthly
- Maintain zero off-contract purchase drift across plant network

Rs. 78.72 Cr Full Run-Rate

90-DAY DEPLOYMENT DISCIPLINE

Phase 1 focuses on pre-qualified initiatives where technical specifications and vendor capacity are fully verified. Plant operations face zero downtime or trial risks. Commercial savings flow directly to operating P&L.

Strategic Recommendations: Multi-Year Procurement Roadmap

HORIZON 1: YEAR 1 VALUE CAPTURE

Target: Rs. 47.90 Cr Validated + Wave 2 Initiation

1. Deploy Wave 1 e-auctions across Packaging Bags (Rs. 14.50 Cr) and Grinding Media (Rs. 11.20 Cr).
1. Execute petcoke and domestic coal index formula contracts (Rs. 9.80 Cr strategic timing).
1. Standardize top 100 consumable SKUs across 26 plants and establish 60/90 day terms.
1. Implement real-time invoice rate verification in ERP to stop contract price drift.

HORIZON 2: YEAR 2 RUN-RATE REALIZATION

Target: Full Rs. 78.72 Cr Direct Savings Run-Rate

2. Consolidate 912 tail suppliers into preferred panelling tiers (Rs. 26.40 Cr indicative value *).
2. Aggregate national demand on capital equipment spares and refractory consumables.
2. Automate catalog purchasing across plants to capture 20% process effort reduction.
2. Embed continuous PCBI commodity price monitoring to optimize annual re-contracting windows.

STRATEGIC PROCUREMENT VISION

Transforming UltraTech Cement Limited procurement from decentralized purchasing into a strategic competency ensures permanent structural cost advantages and superior EBITDA margins against industry peers.

Procucev Domain Authority: Cement & Heavy Manufacturing Provenance

Rs. 45,000+ Cr

INDUSTRIAL SPEND AUDITED

Extensive forensic spend analysis across cement, metals, mining, and heavy process manufacturing.

Extensive Scale

PCBI Index

PROPRIETARY BENCHMARKS

28 industrial commodity benchmark indices covering imported fuels, chemicals, packaging, and freight.

Market Intelligence

Cement Ops

DEEP SECTOR PLAYBOOKS

Hands-on category experience across limestone extraction, clinker burning, and bulk bagging terminals.

Category Mastery

100% Audited

P&L CASH REALIZATION

Turnkey execution model verifying actual rate reductions against ERP payment registers.

CFO Trust

OPERATIONAL EXECUTION ADVANTAGE

Procucev is not a generalist management consultancy. We deploy procurement practitioners, commodity data scientists, and dynamic auction choreographers who work alongside UltraTech Cement Limited teams to deliver hard EBITDA results.

How Customer Procurement Data is Protected: Trust & Governance

aiCEV by Procucev

01

AES-256-GCM Encryption

Cryptographic Standard

All sensitive transactional line items, unit rates, supplier names, and plant identifiers are encrypted with AES-256-GCM using unique per-tenant keys.

AEAD Authenticated

02

Zero Model Training

Strict Data Isolation

Customer procurement data is processed within an isolated tenant enclave. Data is NEVER shared across customers or used to train public machine learning models.

Air-Gapped Privacy

03

Forensic Audit Trail

Transaction Lineage

Every finding, rate dispersion, and savings opportunity carries an immutable checksum linked directly back to specific SAP invoice and PO line-item numbers.

100% Traceability

04

Enterprise Compliance

Hardened Infrastructure

Platform runs on hardened infrastructure with role-based access control (RBAC), multi-factor authentication, and automated audit logging on all data queries.

Enterprise Architecture

ENTERPRISE DATA INTEGRITY PLEDGE

Procucev guarantees full legal and technical custody of customer confidential information. Commercial rate intelligence remains strictly proprietary to UltraTech Cement Limited and is safeguarded under mutual non-disclosure agreements.

NEXT STEP

Management Decision: Converting Opportunity into Realized EBITDA

DECISION 1

Wave 1 Sourcing Signoff

Authorize Rs. 47.90 Cr Tenders

Approve execution of 5 pre-qualified Wave 1 initiatives across packaging bags, grinding media, and imported fuel benchmarks. Direct P&L cash realization in 90 days.

APPROVE WAVE 1 RFPs

DECISION 2

Working Group Charter

Empower Plant Procurement

Charter a joint UltraTech Cement Limited-Procucev Sourcing Steering Committee connecting central procurement with plant managers to ensure operational adoption.

CHARTER WORKING GROUP

DECISION 3

E-Auction Authorization

Dynamic Reverse Bidding

Authorize Procucev dynamic reverse e-auction rules and controlled volume allocation framework for high-competition packaging and consumables categories.

AUTHORIZE E-AUCTIONS

THE OPPORTUNITY IS IDENTIFIED. NOW IT IS TIME TO CONVERT IT.

Across Rs. 5,920.35 Cr of audited spend, Procucev has certified Rs. 78.72 Cr in defensible direct recurring savings and Rs. 14.88 Cr in strategic market upside. Execution begins immediately upon steering committee authorization.

Evidence Appendix: Methodological Provenance & Transaction Traceability

Metric Invariant	Audited Value	Reconciliation Scope & Provenance
Total Spend Evaluated	Rs. 5,920.35 Cr	31,671 invoice line items (April 2024 - March 2026, 24 Months)
Commercial Baseline Spend	Rs. 4,931.00 Cr	Excludes non-controllable taxes, duties, and inter-unit transfers
Gross Identified Opportunity	Rs. 173.12 Cr	Sum of individual potentials across 10 strategic sourcing levers
Multi-Lever Overlap Deductions	Rs. 62.80 Cr	Mathematical deduplication between tenders, volume, and rate cuts
Operational Policy Exclusions	Rs. 16.72 Cr	Carve-out of long-term contracts and single-source OEM spares
Net Defensible Pipeline	Rs. 93.60 Cr	Certified value pool: Rs. 78.72 Cr Direct + Rs. 14.88 Cr Strategic
Direct P&L Savings Opportunity	Rs. 78.72 Cr	Monetized recurring EBITDA cost reduction across 26 plants
Strategic Market Value	Rs. 14.88 Cr	Commodity benchmark alignment; tracked separately from direct savings

PROCUCEV CERTIFIED DIAGNOSTIC AUDIT ATTESTATION

This Executive Brief is certified by Procucev Enterprise Diagnostic Analytics Engine. All numerical invariants balance with Rs. 0.00 variance across the transactional ledger. Process productivity (20.0% effort reduction across 824 POs) and risk avoidance (Rs. 420.00 Cr spend de-risked) are strictly non-monetized for boardroom credibility.
